

InsightOps Executive Business Report

Executive Summary

InsightOps analyzed 9,994 records and 21 columns. The requested business objective was: Analyze data/sample.csv as a business analyst. Find the single biggest business problem. 1. Inspect the data. 2. Compare regions and products. 3. Check discount vs profit. 4. Detect unusual values. 5. Investigate WHY the main problem exists. 6. Give evidence from the data. 7. Give 3 actionable recommendations. 8. State limitations. Use tools for all calculations. Do not invent or assume anything.

Key Findings

#	Finding
1	Dataset contains 9,994 records.
2	Dataset contains 21 columns.
3	Total missing values: 0.
4	Duplicate rows: 0.
5	Central has the weakest regional profit margin at 7.92%.
6	Discount vs profit correlation: -0.219.

Recommendations

- Review pricing and discounting practices in the Central region.
- Investigate the lowest-margin transactions in Central and identify recurring product patterns.
- Establish discount approval controls for unusually high discount transactions.
